ADIRONDACK, USA IN 7 DAY

About the Adirondacks: For generations the Adirondacks in New York State have been a beloved vacation destination, a place where wilderness provides countless opportunities for adventure, exploration, and fun. In fact, it was because of the Adirondacks that the word vacation was created, when city dwellers would escape stifling heat to the cool, clean air of the wild lands in New York. Today, whether it's for a day, a long weekend, or a whole season, the Adirondacks are still a natural wonderland of fresh air, pristine water, and breathtaking landscapes, perfect for a dream getaway. [View Media Kit](#)

About the 7 Day Tour: At over 6 million acres, the Adirondack Park is bigger than five national parks combined: Grand Canyon, Great Smoky, Yellowstone, Yosemite, and Glacier. Recently we were given the fun challenge of putting together an itinerary for a family that wanted to see as much of the Adirondacks as possible in one week. Their goal: to conquer "5 things" each day and they wanted fun activities that kept them active and gave them the chance to truly experience the fresh mountain air and the Adirondack backcountry.

This is quite the story... check it out.
